Procurement and Preservation Clinical Manager

Lifebanc, a dynamic and growing non-profit healthcare organization in Northeast, Ohio is dedicated to saving and healing lives through organ, eye and tissue donation. Lifebanc is one of the original seven independent organ procurement organizations in the United States. We serve nearly four million people and work with 80 hospitals in 20 counties. Our vision is pursuing a future when the decision to donate is an honor and everyone waiting receives a transplant.

Position Description:
This position is responsible to provide leadership in the operational activities of Organ Procurement and Preservation under the direction of the Director as they relate to the evaluation, management and recovery of potential donors. In addition, the Procurement and Preservation Clinical Manager will maintain the skills necessary to function in the role of a Procurement Transplant Coordinator and/or a Surgical Organ Recovery Coordinator, to include supporting all aspects of the organ donation process by providing clinical support through donor evaluation, donor medical management, organ placement and recovery in compliance with CMS and AOPO standards.

Essential Functions

- Provides supervisory oversight of Procurement Transplant Coordinators (PTC's) and Surgical Organ Recovery Coordinators (SORC's) to ensure efficiency and compliance with all Lifebanc, UNOS and AOPO policies and standards.
- Provides guidance to PTC and SORC staff to accurately screen and evaluate cases to maximize donation.
- Provides on-site training and evaluation of clinic staff on advance practice skills for the management of donors and maximizing all donation opportunities.
- Assumes 30% Administrator on Call duties
- Establishes, nurtures, and promotes ongoing relationships with nurses, chaplains, and referring physicians.
- Builds relationships with transplant partners to assure a high level of customer/partner relationships
- Manages the development and performance of the departmental staff to maintain a motivated professional workforce.

Qualifications:

- Bachelor’s Degree from an accredited nursing school
- Minimum two years’ experience as a Procurement Transplant Coordinator
- Two to three years’ experience in supervision/management is preferred
- Two to five years’ experience in critical care nursing
- CPTC (Certified Procurement Transplant Coordinator) preferred
- BLS and ACLS required

**Compensation and Benefits**

We offer an excellent compensation and benefit package including healthcare, employer paid dental, short and long-term disability and life insurance. We also offer paid time off, retirement plan, on-site fitness facility, tuition reimbursement and more!
